

XM Radio Traffic and Weather is ALWAYS on when I'm starting my trips throughout LA: without the in-depth and accurate up to date information I would lose valuable time sitting in traffic. The local traffic reports are completely inadequate, as they don't cover all areas, all the time.

Because I pay for these services by subscribing to XM, I feel it's infringing on my freedom of choosing service provider for my traffic/weather; the National Association of Broadcasters should stay away from this!

Sincerely,  
Michael Gaedeke  
Los Angeles, CA
